How to Run Malwarebytes:

You can download this software from www.malwarebytes.org

To Run the program, double click the "M" icon.

Click on the update tab and then click "check for updates" button. It may tell you that it has to close the program for updates to take affect, so you may have to double click the "M" icon again.

Click on the scan tab. You can leave the dot in front of Perform Quick Scan, or you can click and put the dot in front of Perform Full Scan. Then click the "scan" button.

When the scan is complete it will either tell you that "No Malicious Items Were Detected" and you can click OK to close out, or it will show a screen showing you the items that were detected. Click on the button that will remove all selected items (they should already have check marks in front of them).

A report will appear, and you can just close out of this.

Close the program.
